# A YEARS REVIEW

Dear Citizens and Communities of Onondaga County,

Stories are important to us here at CCE Onondaga. They are how we define who we are and how we measure our impact on others. Education through Cooperative Extension has resonated with the residents of Onondaga County for over 100 years. Every year we receive countless phone calls from residents inquiring about the latest food preservation technique, youth development opportunities, or invasive species. All of these connections made because one of our past workshops, resources, or a simple phone call with an educator has made an impact on their family or friends. Each of these connections is a success story, large and small. They showcase our team's ability make our mission a reality and put knowledge to work; and for that we could not be prouder. Our 2019 success stories would fill the pages of this report over and over again. We could not possibly include them all, although all of them have been equally important. This year, we have chosen one standout success story from each of our main program areas. Please continue to stay up to date with all of our many success stories through our monthly Executive Email. I hope you find our teams work, and the photos which showcase their impact, as impressive as I do.

As our world continues to grow and change, CCE Onondaga evolves its programming year after year to meet those challenges. Apart from our Mission, this is the keystone of our Vision for our organization: that CCE Onondaga's programing, organizational structure and facilities will evolve to accommodate and sustain the ever growing and changing needs of Onondaga County. Whether educational efforts are needed to address tick and Lyme disease, food security, youth development programming in our urban areas, harmful algae blooms, or continued support and protection of our valuable farmland...CCE Onondaga will seek to rise and fill the need.

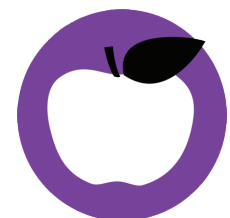

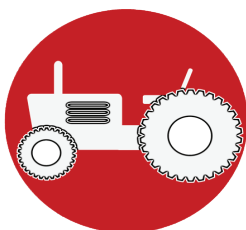

Our Board and Staff want to express our deep appreciation for our volunteers, the support we receive from Onondaga County government, all of the Onondaga County Departments we work with, the City of Syracuse, New York State Ag and Markets, and Cornell University. Without this support we could not deliver on our unique and vital mission. We also could not deliver our educational programs with collaborating with other organizations. They are listed in the back of this report, please read who they are.

I invite you to come be a part of our next success story. Please stay in touch with us by signing up for our Executive Email Newsletter. You will receive updates and notifications on our events and programming. To connect, sign up on our Facebook page or email us at [onondaga@cornell.edu](mailto:onondaga@cornell.edu).

All the best,

David Skeval  
Executive Director

David Duerr  
Board President, 2019

# 4-H YOUTH DEVELOPMENT

Youth development...what does it truly mean and how does it relate to 4-H? **YOUTH DEVELOPMENT IS A PROCESS THAT PREPARES A YOUNG PERSON TO MEET THE CHALLENGES OF ADOLESCENCE AND ADULTHOOD WITH RESILIENCE, ACHIEVE HIS OR HER FULL POTENTIAL, AND CONTRIBUTE TO SOCIETY IN MEANINGFUL WAYS THROUGHOUT THEIR LIFETIME.** Participation in 4-H clubs provides opportunities for youth to learn and practice essential life skills that will serve them now and in the future, and experiences to expand life's possibilities. Participation in 4-H provides the building blocks for leadership! 4-H builds:

- COMMUNICATION SKILLS AND PUBLIC SPEAKING
- DECISION MAKING AND PROBLEM SOLVING SKILLS
- STEWARDSHIP AND COMMUNITY SERVICE
- HEALTHY RELATIONSHIPS
- LEADERSHIP

With its roots in agriculture, Onondaga County 4-H clubs now encompass a variety of experiences ranging from animal science to robotics, science and technology, sewing, cooking and healthy living...just to name a few. **4H EMPOWERS YOUTH TO DEVELOP SELF CONFIDENCE, MATURE IN SELF DISCIPLINE AND RESPONSIBILITY WITH A SENSE OF BELONGING, FEEL SAFE PHYSICALLY AND EMOTIONALLY WHILE ACTIVELY PARTICIPATING IN A GROUP, DEVELOP A SENSE OF MASTERY AND PRIDE IN SUCCESSFUL COMPLETION OF A PROJECT, WHILE WORKING WITH OTHERS TO PROVIDE SERVICE TO THEIR COMMUNITIES.**

In 2019, 4-H clubs in Onondaga County participated in a variety of events, including STARR (State Teen Action Representative Retreat), Cornell University Career Exploration Conference, Public Speaking Event, Horse Bonanza, Syracuse Art on the Porches Arts Festival, Onondaga County Youth Fair and the New York State Fair. These community, county, regional and state-wide events provided youth a platform to proudly and confidently interact with the public, showcase their animals, demonstrate STEM (science, technology, engineering and math) and homestead projects, lead cooking demonstrations and share educational crafting activities with the public.

Today's youth face many challenges. **PARTICIPATION IN 4H PROVIDES YOUTH WITH THE SKILLS, EXPERIENCES AND ONGOING SUPPORT TO ADDRESS AND OVERCOME THEM.** Today's youth are seeking direction in their lives:

- 4-H club leaders, volunteers and parents serve as positive role models
- Older 4-H members mentor and provide peer leadership to younger members
- Youth facing special life challenges are held to high expectations, and with the support and encouragement of their club leaders, volunteers, parents and peers, are able to overcome these challenges and experience success, confidence in their own special abilities, and to push their limits beyond what they imagine is possible

# AGRICULTURE

**DID YOU KNOW** -- Approximately 20 percent of the state's land area, or nearly 7 million acres, is farmland? Over two-thirds of Onondaga County's land area is actively farmed land, forests and open space, with over 150,000 acres in farms alone.

The abundant farmland in Onondaga County. Where would we be without it?

Farming is of great importance to Onondaga County. It provides **JOBS** for many, contributes **MILLIONS OF DOLLARS INTO THE ECONOMY**, and a satisfying **WAY OF LIFE** for many families.

Farming is dependent on many resources, but a most critical one is farmland. Protecting farmland from development and keeping it as farmland is an important key goal of CCE Onondaga Agriculture. The avenue that is most used to protect this farmland is with conservation easements. A conservation easement is a voluntary legal agreement between a landowner and a land trust or government agency that permanently limits uses of the land in order to protect its conservation values.

New York State provides funding to farmland owners through its Farmland Protection Implementation Grant (FPIG) Program. This program places conservation easements on productive farmland, in perpetuity, to protect it from uses other than farmland. As of June 2019, **THIS PROGRAM HAS HELPED PRESERVE MORE THAN 75,000 ACRES OF NEW YORK FARMLAND** with millions of dollars awarded to these landowners.

CCE Agriculture provides key education regarding this NYS FPIG program through annual workshops for farmland owners that may be eligible and have a true desire to protect their valuable farmland resource. We cover different aspects of the program in these workshops, including the basics, site plans, land appraisals and tax implications. We also assist farmland owners with the complex application process of this program.

Agriculture is important to Onondaga County and **PROTECTING FARMLAND FROM DEVELOPMENT IS VITAL** to ensuring the growth of this industry. CCE Onondaga will continue to educate and support the preservation of our farmland for generations to come.

## NATURAL RESOURCES

**DID YOU KNOW --** About 40% of salt use in some areas of NY are from private users? In addition to being used on public roads, salt is also used on parking lots and internal roads of commercial and industrial establishments, schools, churches, apartment complexes, camp roads, or private driveways and drives.

Adding too much salt to an icy surface is an unnecessary cost and can increase damage to concrete, metal, drinking water, vegetation, fish and wildlife, as well as air and water quality -which can impact human health.

Private contractors, those who hire private contractors, and individuals who apply their own de-icing/anti-icing products have an **OPPORTUNITY AND RESPONSIBILITY TO IMPLEMENT MORE SUSTAINABLE PRACTICES** that reduce the negative environmental, health, and financial impacts of over application or rock salt.

On October 29th, CCE Onondaga helped run a **SNOW AND ICE CONTROL WORKSHOP**. The goal of the workshop was to increase the driving public's level of service while decreasing the amount of material put onto the road.

This workshop was conducted through a cooperative partnership between Central New York Planning & Development Board, Cornell Cooperative Extension of Onondaga County, Onondaga County Soil & Water Conservation District, New York State Department of Transportation Region 3, Central New York Stormwater Coalition, and Skaneateles Watershed Agricultural Program.

The highway departments can **USE THE KNOWLEDGE THEY GAINED ON PROPER CALIBRATION TO CALIBRATE THEIR ENTIRE FLEET**. There were a total of 77 highway department personnel in attendance from five counties and 21 municipalities. There were also three school districts, two private contractors, and one lake association. This training showed how to use the optimal amount of salt to both keep drivers safe and also be good stewards of the environment.

Proper equipment operation and calibration is essential for municipality cost savings as well as good for the environment. On-site equipment calibration was provided so trucks were prepared for this years winter.

CCE Onondaga is continually providing workshops to protect the beautiful waters of Skaneateles lake. Proper calibration of salt spreaders is one more aspect to **HELP PROTECT THIS WATER RESOURCE**.

## 13

Since 2017, Nutritionists working with the SNAP Education Program have been working with the Liberty Partnership Program (LPP). The Liberty Partnership Program (LPP), is a collaborative project among the New York State Department of Education, Le Moyne College, and the Syracuse City School District. The Director of the LPP at LeMoyne College reached out to the Nutrition team in Onondaga County to provide nutrition and healthy lifestyle skill-based education programs as part of a broad range of support services for their health and wellness component as part of a college and career readiness program.

National data indicate that **LOW INCOME, MULTI ETHNIC, REFUGEE SCHOOL AGED CHILDREN ARE AT RISK FOR OBESITY**. Limited understanding of, and access to healthy foods within city limits, contribute to obesity risk for low-income, multi-ethnic refugee school-aged  $\geq 10$  years old. The LPP teens gained both the **CONFIDENCE AND COMPETENCE** to purchase and prepare healthy food through engagement in Eat Healthy Be Active Community Workshop lessons as well as the confidence to share newly-gained knowledge and skills with others while engaging in parallel programming to develop leadership skills – a key focus of the LPP.

Several of the students participating in this program were able to facilitate these nutrition lessons with nutrition education at the NYS Fair were chosen to serve on the Syracuse City School District Student Food Council.

In October 2019, The Director at LPP LeMoyne was selected to present at the LPP State Annual Conference in Albany to discuss best practices for the Healthy Living Skills component of their program and the added value of SNAP Education.
